

**Manage Alertness • Eliminate Fatigue**

## **Case Study – Hunter Valley Operations (HVO)**

Site Name: Hunter Valley Operations (HVO)

Location: NSW, Australia

Commodity: Coal

Vehicles: 83 rear dump haul trucks

### **Overview**

HVO deployed SmartCap in 2012 to add to its existing FRMS framework. As a mandatory tool for operators of the haulage fleet, SmartCap provides real-time fatigue alarms to a central control room, which triggers safety interventions.

### **Outcomes**

HVO have seen a near-total elimination of fatigue incidents from their business since introducing SmartCap.

### **Challenges**

Strong union presence necessitates comprehensive and ongoing consultation
